

# Kings County

## — Fact Sheet —

### What is the Census?

- ▶ The U.S. Constitution requires an accurate count of every person living in the United States every 10 years. The next census is in 2020 and asks questions that provide a snapshot of the nation and will determine how more than \$675 billion in federal funding is distributed to states and communities each year. Census results affect your voice in government, how much funding your community receives, and how your community plans for the future.
- ▶ The following communities are the hardest-to-count (HTC) by the census:
  - Latinos, African Americans, Native Americans and Tribal Communities, Asian American and Pacific Islanders (AAPI), Middle-Eastern North Africans (MENA), immigrants and refugees, farm-workers, people with disabilities, LGBTQ, senior/older adults, homeless individuals and families, children under 5 years, veterans, areas with low broadband subscription rates and limited or no access, households with limited English proficiency.<sup>1</sup>

### Why is my community undercounted?

- ▶ Approximately 47% of Kings County residents live in hard-to-count neighborhoods. These neighborhoods include some of the hardest-to-count (HTC) groups, including Latino (54%), African American (8%), and Native Americans (3%).<sup>2</sup>
- ▶ Noncitizens may be less likely to respond in 2020 due to the planned addition of a citizenship question. Approximately 12.2% of Kings County residents are noncitizens, and are especially vulnerable to being undercounted.<sup>3</sup>
  - Immigrant communities are often wary of the government and fear that census information could be used against them, thus discouraging participation.

<sup>3</sup> <https://datausa.io/profile/geo/kings-county-ca>

- ▶ 6.2% of Kings County's population currently lives in census tracts that did not receive a census questionnaire by mail in 2010. Many of these areas did not have traditional addresses, had high numbers of seasonally vacant housing, and were either rural or sparsely populated.<sup>4</sup>
  - According to the Census Bureau, the net undercount in these tracts in 2010 was about 8%, making Kings County one of the hardest-to-count counties in 2020.
- ▶ Young children, who are frequently undercounted by the census, make up more than 8% of Kings County's population, which is among the highest shares of children in the state.<sup>5</sup>
- ▶ Language access can contribute to an undercount. According to data from the U.S. Census Bureau, 40.2% of the population in Kings County speaks a language other than English at home.
- ▶ Housing conditions such as rentals, multiple family homes, or mobile homes make outreach harder for the Census Bureau to find and count residents. Approximately 45.8% of Kings County residents live in rentals.<sup>6</sup>
- ▶ Internet connectivity is yet another barrier:
  - While the 2020 Census will be the first in history to be completed largely online, Kings County communities and residents still face barriers to connectivity, particularly the 26.2% of Kings County residents with no broadband internet subscription.<sup>7</sup> This can pose a challenge to rural areas with low internet connectivity and people with lower incomes who are less likely to have a smart phone or internet service at home.

## What does an undercount mean for my community?

- ▶ When you fill out the census, you help:
  - Determine how many seats your state gets in Congress.
  - Guide how federal funding is distributed to states and communities each year.
  - Create jobs, provide housing, prepare for emergencies, and build schools, roads and hospitals.
- ▶ In 2018, Kings County received \$22.3 million of federal funding for Section 8 Housing Choice Vouchers, which assists residents in securing affordable housing in their communities.<sup>8</sup>
  - The Section 8 Housing Choice Voucher Program uses census data to determine who the program serves, where they live, how federal funds are disbursed to California, and how the state distributes funds amongst its counties.<sup>9</sup>
- ▶ Kings County receives census related federal funding for medical services, including clinics and children's health insurance.
- ▶ In the 2017-2018 school year, Kings County received over \$11 million from the \$15.4 billion dollar federal budget for Title I Every Child Succeeds Act, which provides financial assistance to local educational agencies (LEAs) and schools with high numbers or high percentages of children from low-income families.<sup>10</sup>
  - If your community is undercounted, low-income areas would lose federal funding for textbooks, school supplies and food for students, which aid children in meeting academic standards.

<sup>10</sup> <http://www.ed-data.org/county/Kings>

- ▶ Since 2020 Census data will be used to redraw legislative district lines, it can affect political representation. For example, Assembly District 21 (Salas) which encompasses parts of King County, 35.8% of households are predicted to not respond initially to the census.<sup>11</sup>

## How Can I Help?

- ▶ There are 3 easy ways you can help make sure your community completes the census and receives funding for important services.
  - (1) Fill out the census form online or on paper.
  - (2) Ensure your family, friends, and coworkers fill out the census.
  - (3) Educate your community about the census and why it is important to complete the census.
